

MIKE GARNER & SUE ROBERTS

DIRECTORS

WWW.DYMONDENGINEERING.CO.UK [DYMOND ENGINEERING, BARNSTAPLE EX31 2ND](#)

Sue is taking surfing lessons and Mike is a member of a golf club, which has opened up a new social life. The way of life has a quality we did not experience when living on the South East coast, and we still feel a thrill on our drive to work as the route brings back memories of family holidays.

MY CAREER IN NORTH DEVON

Mike began his career as a mechanical engineer with Rolls Royce in Bristol, working in a team developing engines for military aircraft. After a varied career in manufacturing he set up a business improvement consultancy in 2005. Sue studied Law and Politics in London and began her manufacturing career as a graduate recruit with a major printing company near Bath. In 2008 she joined Mike's consultancy.

Together they purchased Dymond Engineering which specialises in the manufacture of metal shop fittings and retail display equipment. The company offers metal fabrication capabilities as well as design and value-engineering expertise and supplies metal products throughout the UK.

After living in the South East we were seeking an improved quality of life. We looked at businesses for sale elsewhere in the UK, but Dymond offered the best business opportunity and the best synergy with our skills. North Devon is more accessible than people might think, with a vibrant manufacturing sector that will surprise you. It was the business that brought us to North Devon and we love it here.

"Family and friends love coming to stay".
