MY LIFESTYLE IN
NORTH DEVON

Working whilst learning has enabled me to enjoy a well-balanced lifestyle. I enjoy working on motor vehicle projects, motorcycle riding, football, fishing and golf.

MY CAREER IN NORTH DEVON

I studied A levels in Mathematics and Physics before I started my apprenticeship in Maintenance Engineering. During which I have completed: BTEC Level 3 Mechanical Engineering; City and Guilds Level 3 Engineering; NVQ Level 3 Maintenance Engineering; HNC Manufacture and Design Engineering. I am currently studying for NVQ Level 4 Maintenance Engineering and a Foundation Degree.

My role at Actavis as a Maintenance Engineer, involves a wide variety of duties: completing planned maintenance activities on machinery, attending breakdowns, diagnosing and correcting faults, getting involved with engineering projects and working within set standard operating procedures (SOPs).

I discovered this career opportunity through the vacancies section of the South West Apprenticeship website.

This role has helped me develop my team working skills, built my confidence to work on my own initiative and enabled me to gain skills and knowledge that has helped both inside and outside of work. I've gained valuable relationships with work colleagues both in work and socially.

"Working in North Devon offers the opportunities of a good career alongside an excellent place to live".
