MADE IN ENGLAND

SUSTAINABILITY

Sustainability is a part of the Turnstyle DNA and we ensure that we are continually responsible for minimising our waste output and reducing our carbon footprint.

We have removed 99% of single use plastics from our packaging and replaced them with fast and completely biodegradable alternatives. We operate from a highly insulated factory and offices, using our own solar energy source. We recycle everything where possible, including canteen waste.

Our head office building in Devon has been insulated with double the amount of installation than normal building regulations, ensuring we use at little emissions as possible during the colder months. The energy we do use is majority solar and alongside our heat exchange system which allows for efficiency in what we do use. We try to maintain as little energy use as possible with staff diligence in turning screens off when not in use and making sure lights and other unused items are not left on.

Even our materials are environmentally conscious, such as our leather which is tanned with natural vegetable dyes sourced from Italy. Our trademark Amalfine™ material is also made up of a composite blend, which includes biproducts such as marble dust. Best of all we make our handles to last, strongly believing that if you buy well and there is only a need to buy once. Not only do we use sustainable material for our products, but for our staff uniforms too. All Turnstyle uniforms are made from 100% organic cotton, making them excellent quality, comfortable to wear and long lasting.

We are working hard with all our staff and clients to cut down air-travel, and endeavour to replace as many face to face meetings as we can with online sales and training sessions. Our 'Bike to work' incentive scheme offers team members the opportunity to reduce their carbon emissions, while keeping fit and all our in-house food ordering is organic and locally produced.

With donations for tree preservation and planting, we have offset our carbon footprint three-fold, making us carbon negative. As proud members of '1% for the planet', we donate 1% or more of our annual turnover to environmental causes and organisations.

Nurle

As part of working with 1% of the planet, we will be sponsoring both local and national charities such as **Nurdle** a charity who remove microplastic pollution from our beaches, with their innovative ‘Sand Sifting Trommel’ machines.

Another is the community driven charity **Surfers Against Sewage**, who dedicate their free time to keeping our beaches and oceans clean, by organising beach cleans as well as many other environmental projects. **Plastic Free North Devon** are another community lead organisation devoted to inspiring North Devon residents, tourists and businesses to reduce their consumption of single use plastics.

The River Trust is an umbrella organisation of 60 members in UK and Ireland focusing on keeping our rivers healthy and our water clean. In turn this helps our crops grow and keeps our wildlife thriving. **The Butterfly Conservation** conserve the dramatically declining butterfly and moth population, by creating butterfly reserves, recording important data, educating schools and the general public, as well as re-introducing extinct and threatened species.

The Devon Wildlife Trust, their vision is for Devon to be rich in wildlife by caring for over 50 wildlife havens and passionate about recovering species alongside many other projects with schools and volunteers.

Further afield we will be supporting the charity **Taking Root** who are committed to the reforestation of our fast depleting rainforests around the world. They use a data driven approach to help farmers increase yields.

Working with local feminine based leadership programs, the **TreeSisters** focus on creating resources and experiences that empower women both spiritually and practically, to accelerate tropical reforestation within their environment. They envision a world which it is normal for everyone to protect and restore themselves.

The Young People’s Trust for the Environment is a charity which aims to encourage young people’s understanding of the environment and of the need for sustainability.

Also, part of our 1% family, we will be supporting **Carbon Literacy** who work to inform and educate individuals, communities and organisations about climate change, carbon footprints, how we can do our bit to help and why it is so important.

A BIT ABOUT US ...

Turnstyle Designs was founded by Steve Roberts in 1992. Steve and his wife Christina work collaboratively to design some of the worlds most innovative decorative hardware, using a broad palette of materials and finishes including, brass, leather and Amalfine™. Turnstyle Designs have been delivering luxury door hardware for high-end residential, commercial and yacht projects. From handstitched leather to individually hammered door hardware, attention to detail is found in every product made. In 2018 they were awarded the prestigious Queen's Award for Export and are proud supporters of 1% for the Planet.

Turnstyle is proudly British made and manufactured in the beautiful Devon countryside. With multiple product combinations and flexibility to allow customisation, there is something for everyone.
